PERSONAL PROJECTS

- **JobBridge** Github
Platform connecting job seekers with employers for posting and finding job opportunities.
 - Technologies used: React, Node, Express, MongoDB, ReduxToolkit
 - Basic features: login, registration, and profile updates for job seekers and employers.
 - Job seekers receive email alerts for jobs matching their criteria.
 - Job seekers track the status of their applications and get an email when the status changes.
 - Employers can post jobs with descriptions, qualifications, and application instructions.
 - Employers can view job applicants and accept or reject their applications.
- **QuizNest** Github
Developed a secure and interactive online quiz platform.
 - Technologies used: React, Node, Express, MongoDB
 - Users take quizzes, see rankings on leaderboards, and review correct answers for learning.
 - Admins create and manage quizzes with customizable questions, answers, and access codes.
 - The platform prevents cheating by disabling tab switching and text copying during quizzes.
 - Quizzes are accessed via unique codes, ensuring only authorized users can participate.

TECHNICAL SKILLS AND INTERESTS

Languages: C, C++, Html, Javascript

Frameworks & Tools: ReactJs, NodeJs, Express, Git

Databases: MongoDB, MySql

Others: Data Structures and Algorithms, Object Oriented Programming, Operating System, DBMS

ACHIEVEMENTS

- Solved 900+ problems across platforms
- LeetCode Max Rating 1726
